Objectives and investment policy

Objective

The fund aims to provide income and capital growth in the medium term.

Investment Policy

The fund invests in the shares of UK and overseas companies whose businesses meet a range of ethical investment criteria.

Essential features of the fund:

- The fund has the discretion to invest in the investments including those described above, within its ethical investment criteria with no need to adhere to a particular benchmark.
- Within its ethical investment criteria, the fund has no specific target market or geographic sector.
- You can buy and sell shares in the fund on each working day.
- Income from the fund will be added to the value of your investment.
- Full details of the ethical investment criteria are available from www.linkfundsolutions.co.uk, the Authorised Corporate Director's website and may be amended from time to time.
- Derivatives may be used to manage the risk profile of the fund, reduce costs or generate additional capital or income. Currency hedging arrangements may be used to reduce the risk of currency movements in the value of overseas investments held by the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of a fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of an appropriate benchmark index. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Currency Risk: As the fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Counterparty Risk: As the fund may enter into currency hedging arrangements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund and the fund receiving less than is due or receiving nothing.
- Financial Techniques Impact: The fund may invest in derivatives to generate additional capital or income. A movement in the value of the derivative's underlying asset may have a much larger negative impact on the value of the fund than if the fund were to hold the underlying investment itself.
- Ethical Investments: The fund is prevented from investing in certain sectors or companies for ethical reasons. This narrower range may constrain the fund's performance.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.
