

Trojan Global Income Fund

All data as at 31 July 2022

taml.co.uk

The investment objective of the Trojan Global Income Fund is to seek to achieve income with the potential for capital growth in the medium term (3 to 5 years). The Fund's investment policy is to invest at least 80% of its assets globally in equities and equity-related securities. It may also invest in government and public securities (such as sovereign debt and treasury bills), corporate bonds, real estate (via REITs), private equity, cash, cash equivalents (including money-market instruments) and deposits. Any comparisons against indices are for illustrative purposes only.

July Commentary

Your Fund returned +3.1% during the month compared to +7.7% for the MSCI World Index (NR) GBP.

Results season is in full swing and has generally been reassuring with a couple of inevitable exceptions. Many of our companies are demonstrating their resilience and competitive advantages as they manage to defend their profitability in the context of heightened inflation and potentially slowing demand. It is in such difficult times that the sort of businesses we favour come to the fore.

A good example is McDonald's. This is a long term holding in the portfolio and an excellent business. Recent results were sparkling with sales up close to 12% in Q1 as the twin revenue streams of rent and royalties lends predictability to the company. Some 40,000 stores in over 100 countries delivered the core offering of value and consistency for which the brand is known. Especially in these more straitened times the company represents an affordable treat which consumers love. As the CEO said in the recent results presentation "we're in a share taking mode".

Not only is McDonald's a durably compounding business but there are reasons to be optimistic in the near term. The company has been renovating the US store base and expanding the international footprint. Capital intensity has been

reduced as the exit from Russia increases the proportion of franchised stores to the benefit of margins.

Digital initiatives centred around marketing (including celebrity menus from rapper Travis Scott and Mariah Carey), ordering and customer loyalty are driving both engagement and improved customer preference data on the 60m people that enter the stores each day. This in turn should allow for greater efficiency.

The combination of resilient growth and improving returns should underpin consistent free cash flow and income growth for years to come.

Equity markets have enjoyed a strong month as the hope of peaking cyclical inflation in the context of widespread pessimism has led to what may be a counter-trend move. Even as equity investors become more buoyant the US treasury market remains resolutely downbeat. The 2-10 spread¹ has moved from +5bp to -24 bp over the month (and has declined further post month end).

We remain cautious and wait patiently for better value to appear to redeploy capital in the portfolio.
