March Commentary

The Fund produced a return of +0.3% during the month compared to a return of -2.8% for the FTSE All-Share Index (TR), holding up well in a volatile month.

In March, markets witnessed the first major US bank run since the global financial crisis. In order to meet mounting requests from customers for their cash deposits, Silicon Valley Bank was forced to crystallise a \$1.8bn loss on its treasury portfolio, leading to a failed emergency equity raising and the ultimate collapse of the bank. In the ensuing days, other banks, including Signature Bank and Credit Suisse, suffered varying degrees of contagion. It seems that the crisis has been contained for now, but these events unsettled investors, with the FTSE All-Share Banks index drawing down -16.9% in the month.

Your Fund does not hold any banks, despite the sector being the third largest in the UK index. This was to our detriment in much of 2022 as investors focused on the increasing lending margins and profits that rising rates initially support. But we remain wary. Banks are by their very nature extremely levered - shareholders' equity represents just a wafer-thin sliver between the huge loans book and deposit base. Small changes in asset

values can result in large and sudden movements in the equity and thus share prices. The same volatility tends to hold for dividends from the sector too. In periods of stress, capital is retained to shore up balance sheets, and dividends thus often disappear.

Conversely, we retain our preference for the steady compounders that can underpin the Fund's own resilient dividend growth. By way of example, we recently made a new investment in Roche, one of the world's largest pharmaceutical businesses and leading medical diagnostics company. In our view, Roche has robust intellectual property, an enviable track record of new drug innovation and a high-growth diagnostics business which combine to make it an attractive long-term investment. However, short-term pipeline uncertainty and post-Covid normalisation has resulted in recent share price weakness, meaning that today Roche shares are inexpensive, trading with an earnings yield* of over 7% and dividend yield of 3.7%. If the company can return to delivering a defensive, mid-to-high single digit earnings growth, as we expect, then this represents an attractive opportunity to embed further resilient dividend growth into the portfolio.

*A company's earnings yield represents its last 12-month earnings divided by its share price.
