September Commentary

Your Fund returned -0.6% during the month compared to -0.7% for the MSCI World Index (NR) GBP.

Our investment in Domino's Pizza has meaningfully increased in value in recent months with the share price appreciating by 36% from the beginning of July to the end of September. Good results catalysed the move as well as the appointment of a new Chief Executive, Andrew Rennie. Mr Rennie has a strong reputation having delivered impressive results at Domino's Pizza Enterprises (the Australian cousin to Domino's UK). He replaces the highly regarded interim CEO, Eliaz Diaz Sese, who remains an experienced and valuable Board member.

This positive share price move has been a long time in the making. The fact that the shares have performed well is not a surprise to us, even if the pace of the ascent looks to be as much about short covering¹ as a change in operational momentum.

In any case, things are on an upward trend. From being a good business with somewhat lacklustre leadership, Domino's is now a better business with

an excellent CEO and a supportive Board. Together they should be able to drive the company forward and capitalise on the underlying operational improvements that have increasingly become evident.

It was reported at the latest results that system sales were up 8% (9.7% on a like-for-like basis) with group revenues up 20%, benefitting from the pass-through of food inflation. Increasing co-operation from the underlying franchisees is seeing important investments, including a new ERP² system and the deployment of GPS across the store network. Delivery times are improving. The roll out of Just Eat, as well as the announcement of a trial with Uber, bolstered orders. Further revenue enhancement will re-invigorate new store openings, which totalled 29 compared to 12 in the first half of the previous year.

The dividend was increased by 3.1% as well as a new £70m share buyback being announced, reflecting confidence in the business.

¹ The buying of stocks or other securities that have been sold short, typically to avoid loss when prices move upwards.
