

# Trojan Global Income Fund

All data as at 31 October 2022

taml.co.uk

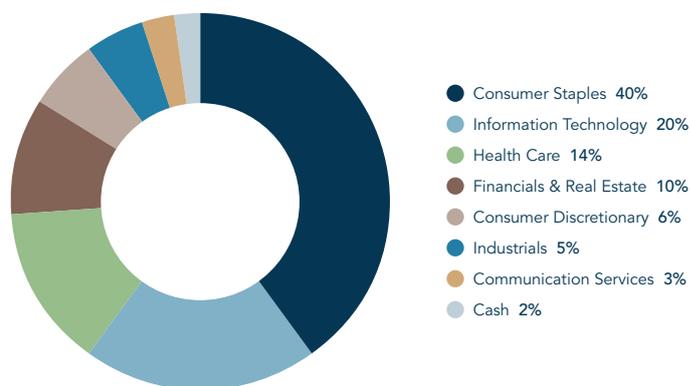

The investment objective of the Trojan Global Income Fund is to seek to achieve income with the potential for capital growth in the medium term (3 to 5 years). The Fund's investment policy is to invest at least 80% of its assets globally in equities and equity-related securities. It may also invest in government and public securities (such as sovereign debt and treasury bills), corporate bonds, real estate (via REITs), private equity, cash, cash equivalents (including money-market instruments) and deposits. Any comparisons against indices are for illustrative purposes only.

## October Commentary

Your Fund returned +0.7% during the month compared to +3.9% for the MSCI World Index (NR) GBP.

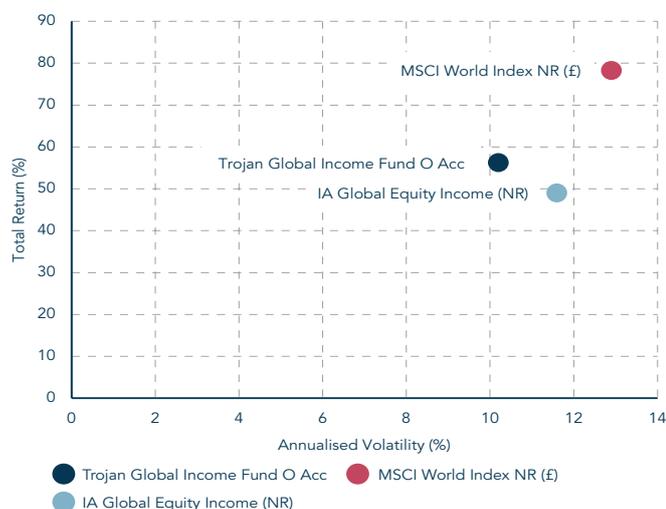

We have established an initial investment in Texas Instruments (TI). The company is a leader in analogue semiconductors. We have spent the last few years patiently building our semiconductor industry knowledge. At the risk of oversimplification, TI designs and manufactures relatively "simple" chips that don't require the latest manufacturing technology and have incredibly long shelf lives. While other semiconductor companies have to constantly design and manufacture new CPUs to satisfy the insatiable need for greater computing power, TI chips work for decades. We believe that roughly half of TI's sales derive from chips designed more than ten years ago. The result is a business with little technological risk and relatively low capital intensity.

The semiconductor industry has a degree of [cyclicality](#), however in the case of TI, we consider this risk to be mitigated by having a conservative balance sheet and capital allocation policy that rewards long-term shareholders. Indeed, we believe TI has one of the clearest frameworks for value creation, and we urge our readers to peruse the Investor Overview document on TI's website. The business is fantastically profitable, ranking in the 89th percentile of S&P500 companies in terms of [free cash flow](#) margins. We consider the shares to be attractively valued and currently yield 3.0%.

The purchase was funded from the sale of Western Union and a reduction in ADP.

## Important Information

Please refer to Troy's Glossary of Investment terms [here](#). Fund performance data provided is calculated net of fees unless stated otherwise. Past performance is not a guide to future performance. Overseas investments may be affected by movements in currency exchange rates. The value of an investment and any income from it may fall as well as rise and investors may get back less than they invested. The historic dividend yield reflects distributions declared over the past twelve months as a percentage of the fund's price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. The yield is not guaranteed and will fluctuate.
